REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the instant invention is directed to a method for determining a possible alternative line-of-sight between a first node and a second node from an aerial image. The closest art Margalit et al. (US Pub 2002/0051269A1), discloses establishing a line of sight between plurality of optical communication nodes and a network controller monitors the network elements and if transmission terminal 16a is disconnected, a search for free transmission units 22 is conducted to find an alternative node with a line of sight to reestablish connection (see Figs. 1, 3, col. 3, [0027] and [0029]. Margalit does not determine the alternative line of sight from an aerial image. The limitations "(b) placing the first node at a first placement that is a distance equal to the resolution in a first direction along the first degree of freedom line from the current placement of the first node, and (c) placing the second node at a second placement that is a distance equal to the resolution in the first direction along the second degree of freedom line from the current placement of the second node; (d) determining if the straight line between the first node at the first placement and the second node at the second placement is a valid, unobstructed line-of-sight;" recited in claim 51, in combination with the other elements of the claims are not disclosed or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 51-52 (now renumbered 1-2 for issue are allowed.
